Web Development Using (CMS)

**supervisor:** Eng/ Noha

**Date:**29-1-2022

# **1-Introduction**

## **1.1 Background(problem)**

There are many reasons that make me work on this project, which is that the project helps people to buy their clothes and their needs from anywhere in the world inside and outside Egypt without making an effort or wasting time and helps the elderly and people with special needs to meet their needs and through the slight development that occurred on the Internet via The project's website

There is no doubt that the most famous brands these days have their own website, and this is a strength for any business owner. Therefore, any business owner who wants his business to flourish and spread and achieve high profits, many times the profits he gets in the store, must have a website for his work. Also, if you want to succeed and thrive in your field, you must focus on the strengths, which is implementing your own website to reach expansion and your reach To a larger number of people on a larger scale, to achieve your goal for the success of the business, to compete with the largest brands, and to achieve all people's desires.

## **1.2 purpose**

we want to facilitate communication between customers and the store and achieve the highest possible profits for the business owner.

## 1.3 competitors

## 1.4 customer analysis

the customer we target women and men at a different ages and their needs to buy clothes and find variety in our store.

## 1.5 scope

Our project is a web site that sells clothes online to men and women of different ages for casual, formal and sport wear. It is a clear and easy-to-use website that facilitates the purchase process simply and clearly for customers, as well as knowing their sizes accurately by guiding the size.

## 1.6 Stakeholders

1. owner of the project
2. customers
3. Admin

# **2.requirements**

## **2.1 functional requirements**

### **2.1.1 Sign up, Login and Logout**

- ♣ Sign up: There are two types of users in the system admin and customer,  
each of them has different necessary data that must sign up with it  
on the website.  
After the signup operation, the customers could use the website.
- ♣ Login: The system should enable all users to log in using their  
email and password. If  
the email and password don't match any record in the database,  
the system outputs an  
error message to the user. The user gets an unlimited number of  
tries to log in to the system.
- ♣ Logout: Logging out of the system.

### **2.1.2 Woo Product Carousel:**

it's a way to make a slider to show some  
products by specifying category filtration.

### **2.1.3 Wishlist:**

provides customer to store some products in order to buy them  
later.

### **2.1.4 search icon:**

to facilitate finding any products and the similar products.

### **2.1.5 language:**

it's supporting Arabic and English language both.

### **2.1.6 shopping cart:**

to show the details to the product like price, size, and  
what I adding to cart.

### **2.1.7 Admin:**

The admin has a dashboard to update or delete any production the site.

### **2.1.8 Rating System:**

The site will give customers the ability to rate product and give an opinion  
about their experience with our store.

## 2.2 nonfunctional requirements

- All-time available:

The system should always be available to the patients so they can use the chat system or make tests or see the tips at any time.

- High privacy:

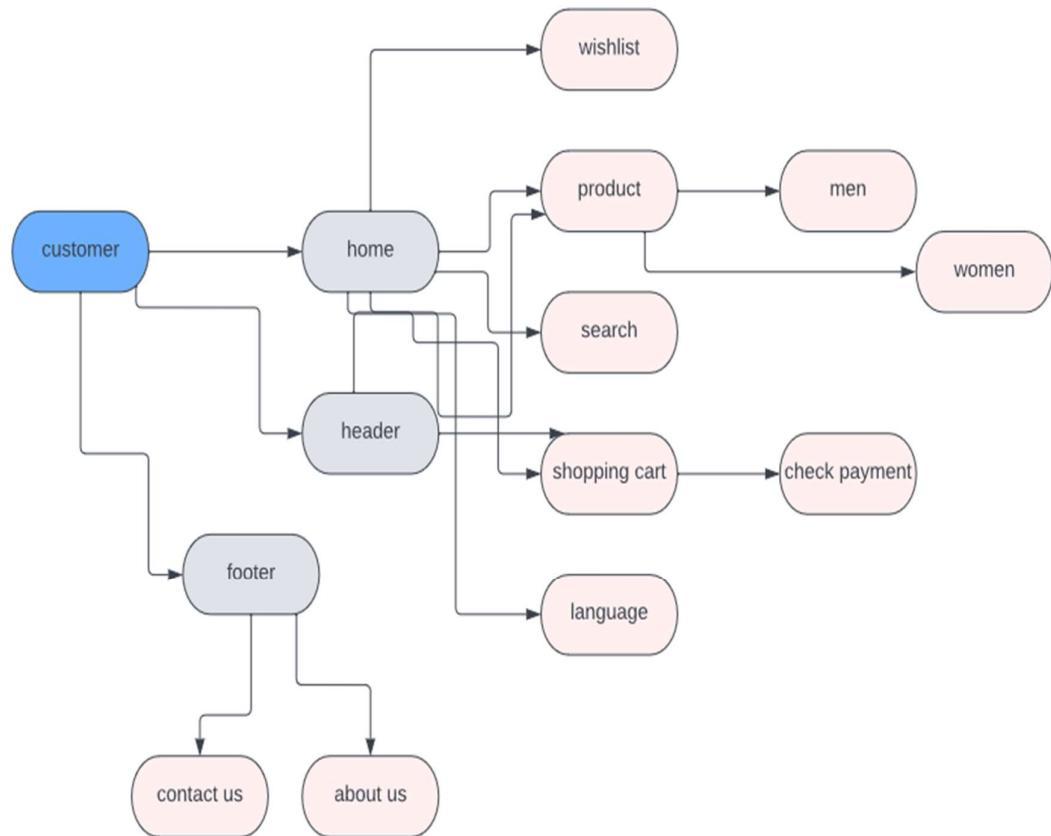

The system should have high privacy to make the patient more comfortable with the doctor.

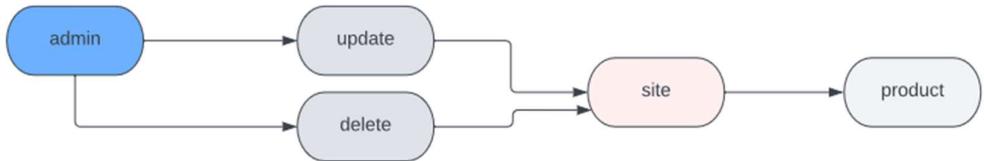

- Security:

The system should be secured to save patient data from any exploitation by encryption.

## 2.3 use cases

### 2.3.1 use case diagram

### 2.3.2 actors

- 1.admin
- 2.customers

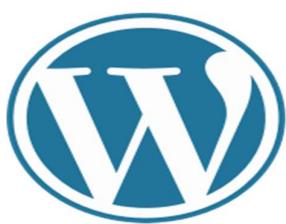

## 3.Objectives(ecommerce)

- 1.To make more sales in ecommerce store. ...
- 2.To increase brand awareness. ...
- 3.To attract more visitors. ...
- 4.To improve customer satisfaction. ...
- 5.To reduce shopping cart abandonment. ...
- 6.To increase conversion rates. ...
- 7.To get more repeat customers. ...
- 8.To improve the user experience.

## 4.implemintation

### 4.1 Tools and technologies

Word Press :

WordPress is only one of the site builders and content management systems users can download and install for free, but it has unique features that make it the most popular content management system in use today.

WordPress tops the list of the three most often used site building packages in the world, followed by Joomla and Drupal. All are free to download and use, all come with numerous add-ons for specialized functionality, and all can be customized to suit the needs of individual users.

But, both Joomla and Drupal require a certain level of technical know-how and familiarity with HTML CSS and the programming language PHP. WordPress allows experienced users to work at that level, too—but, unlike Joomla and Drupal, it also includes features for beginners, so that they can set up a site quickly with no knowledge of code or programming.

## WordPress theme

We started looking for themes that supports RTL for translations

### 1. Woostify theme free version

Woostify provides a library of pre-built websites. Instead of starting the website design from scratch you can import Woostify demo Sites with few clicks and customize them in your own way.

[Press](#)

© 2021 Woostify Privacy Policy All rights reserved. Designed & developed by woostify 

Woostify had the perfect match with our plan .

Problem with Woostify:

The theme has a free version and paid version

Some features like a quick view button and Buy Now button had some problems

Quick view button does not give us the desired look we were seeking  
And could not have access to customize since it is a feature in the pro version .

Buy Now button also is a feature in the pro version and when we installed plug in for that it did not work properly and it take us directly to check out .

So we kept searching for another theme.

## 2- Basel Theme

Link : <https://weadown.com/basel-responsive-ecommerce-theme-gpl1/>

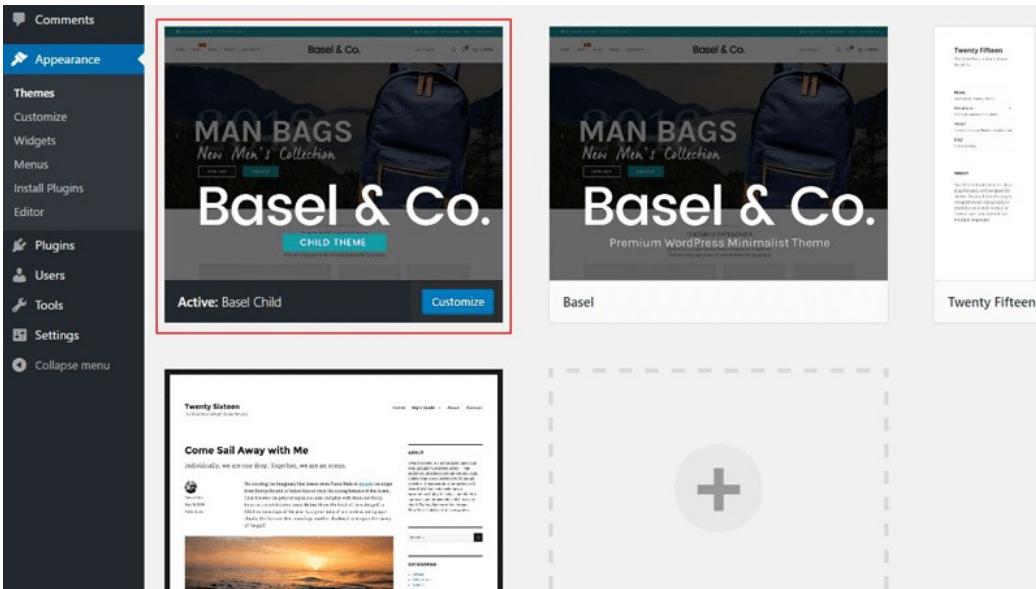

**Install theme through admin panel :**

**Child Theme :**

A child theme is a theme that inherits the functions and styles of the other theme, called the parent theme. Child themes are the

recommended way of modifying an existing theme. Our theme has full support for creating child theme.

## General Layout :

The screenshot shows the 'GENERAL LAYOUT' section of the theme settings. On the left is a sidebar with various options like General layout, Page title, Header, Footer, etc. The main area has sections for Site width (set to Full width), Main Layout (with alignment options: Without, Left, Right), Off canvas sidebar for mobile (ON/OFF switch), Sidebar size (options: SMALL, MEDIUM, LARGE), and Site background (with color selection, upload, and remove buttons, and repeat, size, attachment, position controls).

## Adjusting Header :

We started adjusting the header trying to make it look like the khotwh Website .

The screenshot shows the 'HEADER' section of the theme settings. It includes three logo upload fields for 'Logo image', 'Logo image for sticky header', and 'Logo image - white'. Below these are two slider controls: 'Logo container width' (set to 30%) and 'Logo image maximum width' (set to 165 pixels). At the bottom are 'SAVE OPTIONS' and 'RESET DEFAULTS' buttons.

## TOP BAR :

The screenshot shows the 'TOP BAR' configuration page in the Basel theme settings. On the left, a sidebar lists various theme options like General, Header, Footer, etc. The main panel has a title 'TOP BAR'. It contains a 'Top bar' section with an 'ON' button, a 'Top bar text color' switch between 'DARK' and 'LIGHT', and a text input field for header top bar text. Below that is a 'Top bar background' section with a color picker, upload button, and remove button, along with dropdowns for repeat, size, attachment, and position. At the bottom are 'SAVE OPTIONS' and 'RESET DEFAULTS' buttons.

## HEADER LAYOUT :

The screenshot shows the 'HEADER LAYOUT' configuration page. The sidebar includes options like Header Layout, Shopping cart widget, Appearance, Main menu, etc. The main panel has sections for 'Full Width' (with an 'ON' button), 'Sticky Header' (with an 'ON' button), and 'Header' (with a 'Set your header design.' link). Below these are preview boxes for 'E-Commerce' (base header, double menu), 'Simplified' (Logo center, With categories menu), and 'Logo center' (Logo center, With categories menu). At the bottom are 'SAVE OPTIONS' and 'RESET DEFAULTS' buttons.

## SHOPPING CART WIDGET :

The screenshot shows the 'SHOPPING CART WIDGET' settings page. On the left is a sidebar with categories: General, General layout, Page title, Header (selected), Top bar, Header Layout, Shopping cart widget (selected), Appearance, Main menu, My account links, Other, Footer, Typography, and Styles and colors. The main area has a header 'SHOPPING CART WIDGET'. It contains sections for 'Shopping cart position' (set to 'Hidden sidebar'), 'Shopping cart design' (set to 'Design 2'), and 'Alternative shopping cart icon' (with an 'ON' switch). A search bar at the top says 'Start typing to find options...'.

## APPEARANCE :

The screenshot shows the 'APPEARANCE' settings page. The sidebar categories are identical to the previous screenshot. The main area has a header 'APPEARANCE'. It contains sections for 'Header text color' (with 'DARK' and 'LIGHT' buttons), 'Header background' (with 'SELECT COLOR', 'UPLOAD', and 'REMOVE' buttons, and dropdowns for repeat, size, attachment, and position), 'Header border' (with 'Bottom' and 'Solid' dropdowns, and a 'SELECT COLOR' button), and 'Icons font for header icons' (with 'LINE ICONS' and 'FONT AWESOME' buttons). A search bar at the top says 'Start typing to find options...'. The 'Header' category is selected in the sidebar.

## MAIN MENU :

The screenshot shows the 'MAIN MENU' section of the Basel theme settings. On the left is a sidebar with categories like General, Header, Footer, etc. The main area has two settings: 'Main menu align' (set to 'CENTER') and 'Mobile menu side' (set to 'RIGHT').

## MY ACCOUNT LINKS :

The screenshot shows the 'MY ACCOUNT LINKS' section of the Basel theme settings. It includes four settings: 'Show in the HEADER' (ON), 'Login form in sidebar' (ON), 'Style' (ICON), and 'With username' (OFF).

The screenshot shows the 'OTHER' section of the Basel theme settings. It contains several settings: 'Categories menu' (set to 'Header Primary'), 'Limit categories' (ON), 'Text in the header' (a text input field), 'Search widget' (set to 'REAL SCREEN'), and 'Search icon on mobile' (ON).

## The final view of Header

## Adjusting Footer :

**FOOTER**

**Footer** **ON** **OFF**

**Footer layout**

Choose your footer layout. Depending on column number you will have different number of widget areas for footer in Appearance > Widgets.

Single Column   Two Columns   Three Columns   Four Columns   Six Columns

1/4 + 1/2 + 1/4   1/2 + 1/4 + 1/4   1/4 + 1/4 + 1/2   Two rows   Two rows

Two rows   Two rows

**FOOTER COLOR SCHEME OPTIONS**

**Footer text color** **DARK** **LIGHT**

Choose your footer section background color or upload some graphic.

**SELECT COLOR** **UPLOAD** **REMOVE**

Background repeat   Background size   Background attachment   Background position

**FOOTER COPYRIGHTS**

**Copyrights** **ON** **OFF**

Turn on/off a section with your copyrights under the footer.

**Copyrights layout** **Centered**

Set different copyrights section layout.

**Copyrights text**

Place here text you want to see in the copyrights area. You can use shortcodes. Ex: [social\_buttons]

Copyright © 2023, Khotwh. Developed by Digital Sellers Club

**Text next to copyrights**

You can use shortcodes. Ex: [social\_buttons] or place an HTML Block built with WPBakery Page Builder builder there like [html\_block id="258"]

PREFOOTER AREA

HTML before footer  
This is the text before footer field, again good for additional info. You can place here any shortcode, for ex.: [html\_block id=""]

Scroll to top button  
This button moves you to the top of the page when you click it.

Sticky footer  
The footer will be displayed behind the content of the page and will be visible when user scrolls to the bottom on the page.

Collapse widgets on mobile  
Widgets added to the footer will be collapsed by default and opened when you click on their titles.

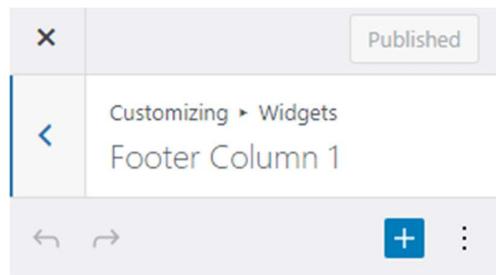

ON OFF

## The final view of Footer :

## Adjusting TYPOGRAPHY :

A screenshot of the Elementor typography settings panel. The left sidebar shows a tree structure with "General", "Header", "Footer", "Typography" (which is expanded), "Typekit Fonts", "Custom Fonts", and "Advanced typography". Under "Typography", there are sections for "Text font" and "Primary font", both set to "Karla" with "Bold 700" weight. The "Text font" section includes a "Subset" dropdown and a "Font size" input field. The "Primary font" section also includes a "Subset" dropdown and a "Font size" input field. A message at the top says "Settings are successfully saved." and there is a search bar at the top right.

Entities names  
Titles for posts, products, categories and pages

Font family: Lora | Style: | Subset: | Font size: px | Color: [SELECT COLOR]

Secondary font  
Use for secondary titles (use CSS class "font-alt" or "title-alt")

Font family: Lato | Style: Normal 400 | Subset: | Font size: px | Line height: px | Color: [SELECT COLOR]

Widget titles font  
Typography options for titles for widgets in your sidebars.

Font family: | Style: | Font size: px | Line height: px | Color: [SELECT COLOR]

## PLUG INS

### 1. WooCommerce

Transform your WordPress website into a thoroughbred e-Commerce store. Delivering enterprise-level quality and features while backed by a name you can trust. Say “hello” to the WooCommerce e-Commerce plugin.

#### **WooCommerce settings**

##### **1. General setting**

 Star ratings should be required, not optional

### 3. Shipping

The screenshot shows the 'Shipping zones' section of the WooCommerce settings. It includes a table with columns for Zone name, Region(s), and Shipping method(s). One zone is listed: 'Egypt' with 'Region(s)' as 'Egypt' and 'Shipping method(s)' as 'Free shipping, Flat rate, Local pickup'. A note below states: 'This zone is optionally used for regions that are not included in any other shipping zone.' Another row is shown with the note: 'No shipping methods offered to this zone.'

### 4. Payment method

The screenshot shows the 'Payment Methods' section of the WooCommerce settings. It lists three payment methods: 'Direct bank transfer', 'Check payments', and 'Cash on delivery'. Each method has an 'Enabled' switch (all are off), a 'Description' text area, and a 'Manage' button.

### 5. Payment method

The screenshot shows the 'Accounts & Privacy' section of the WooCommerce settings. It includes tabs for General, Products, Shipping, Payments, Accounts & Privacy (selected), Emails, Integration, Advanced, and Quick View and Buy Now. Under 'Guest checkout', there are two checkboxes: 'Allow customers to place orders without an account' (checked) and 'Allow customers to log into an existing account during checkout' (unchecked). Under 'Account creation', there are four checkboxes: 'Allow customers to create an account during checkout' (unchecked), 'Allow customers to create an account on the "My account" page' (checked), 'When creating an account, automatically generate an account username for the customer based on their name, surname or email' (checked), and 'When creating an account, send the new user a link to set their password' (checked). Under 'Account erasure requests', there are two checkboxes: 'Remove personal data from orders on request' (unchecked) and 'When handling an [account erasure request](#), should personal data within orders be retained or removed?' (unchecked). Under 'Personal data removal', there is one checkbox: 'Allow personal data to be removed in bulk from orders' (unchecked).

## 2. Contact Form 7

Contact Form 7 can manage multiple contact forms, plus you can customize the form and the mail contents flexibly with simple markup. The form supports Ajax-powered submitting, CAPTCHA, spam filtering and so on.

We used that plugin to create forms for Footer , contact us and Return or exchange order.

## Footer

**NEWSLETTER SUBSCRIPTION**

### 3.Flamingo

Flamingo is a message storage plugin originally created for Contact Form 7, which doesn't store submitted messages.

All messages through contact forms are listed there and are searchable. With Flamingo, you are no longer need to worry about losing important messages due to mail server issues or misconfiguration in mail setup.

It was recommended by the Contact Form 7 developer.

### 4.Product Filter by WooBeWoo

WooCommerce Product Filter plugin allows customers to filter your products / items by price, categories, tags, taxonomy, and attributes. Each filter criteria customizable, giving you maximum control.

100% Elementor Compatibility

FILTER

Showing all 2 results

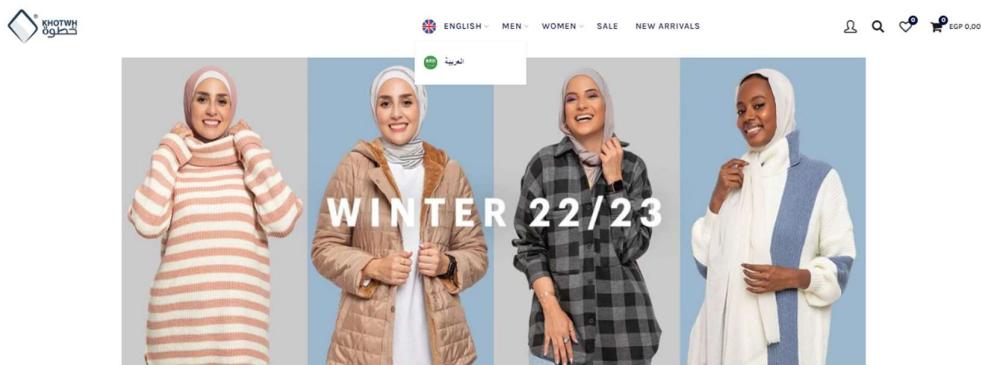

In this plugin , Filter by color was not available So we had to install another plugin related to this Filter by WooBeWoo plugin called Woo Product Filter PRO .

## 5. Weglot Translate

Weglot Translate is the leading WordPress translation plugin, trusted by 60,000+ users worldwide. Translate your WordPress website into 110+ languages and go multilingual within minutes.

Increase visibility and boost conversions with ease by adding multilingual functionality. Weglot Translate is fully optimized for multilingual SEO, with every translated page automatically indexed by Google.

After translating

## 6. JVM rich text icons

Add inline icons to rich text fields like: paragraphs, headings, lists or buttons anywhere. This plugin ships with the free Font Awesome icon set as default icon set. You can choose between version 4.x, 5.x and version 6.x.

This plugin also provides an easy to use interface for creating a custom

icon set based on SVG icons. Custom icons can be upload from the plugin settings using an easy to use drag & drop uploader.

The plugin also creates a new field type for Advanced Custom Fields (ACF) : JVM Icon. Now you can create custom fields that work with a the font awesome icon set or even better: A custom created icon set.

If font awesome or the built in custom icon set configuration do not meet your needs you can also create your own custom icon set and load it using hooks provided by the plugin.

## 7. Product Variation Swatches for Woocommerce

WooCommerce Variation Swatches plugin enables you to convert default WooCommerce product attribute drop-downs into stylish swatches. This plugin helps us exhibit product variants (based on color, size, texture, etc.) in style, assisting customers to choose their preferred variant quickly.

Using this variation swatches for WooCommerce plugin, you can create swatches of 4 types to display the product attributes as square or circle icons.

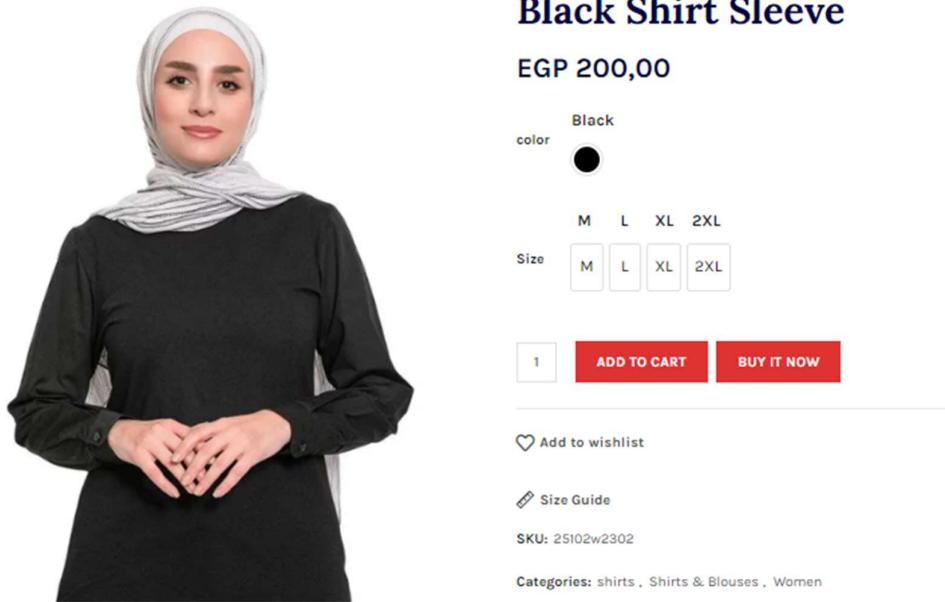

This plugin also helps us to Set the unavailable and out-of-stock variant's swatches with three custom options –

1. Hide
2. Blur
3. Blur with a cross --> this is our choice .

## 8. SMNTCS Quantity Increment Buttons for WooCommerce

Increment Quantity Buttons for WooCommerce adds two additional buttons to the quantity input field on the WooCommerce product page to easily increase and decrease the quantity via button click.

This is what our single product page looked with out this plugin

After applying plugin

## 9. All-in-One WP Migration

Introduced in 2013 and used by over 60 million websites, All-in-One WP Migration is verifiably one of WordPress' most trusted and utilized plugins for moving websites with absolute ease.

Intently built with the non-technical user in mind, All-in-One WP Migration comes loaded with newbie-friendly functions that allow you

to migrate your WordPress website with little to no technical knowledge or experience.

## 10. Elementor

Elementor is the leading website building platform for WordPress, enabling web creators to build professional, pixel-perfect websites with an intuitive visual builder. Quickly create amazing websites for your clients or your business with complete control over every piece, without writing a single line of code.

We used Elementor to build our pages

First our home page :

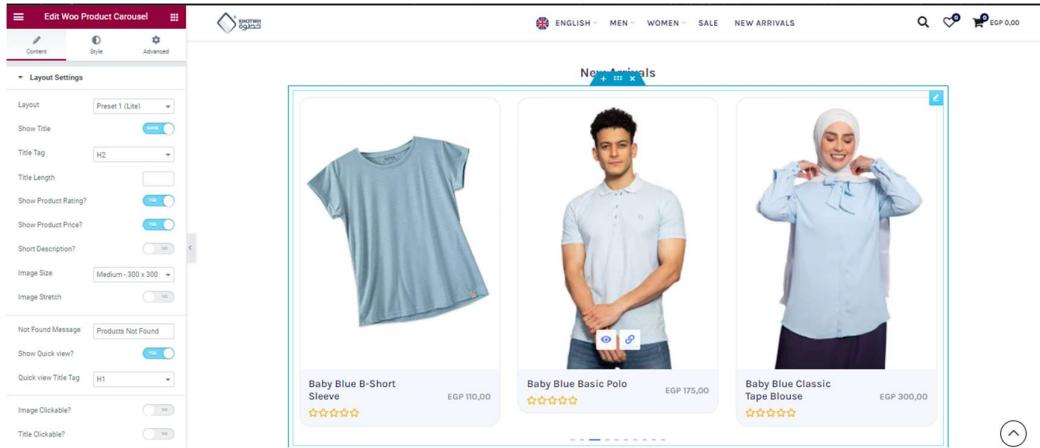

Adding our banner with image :

Adding our categories with a call to action :

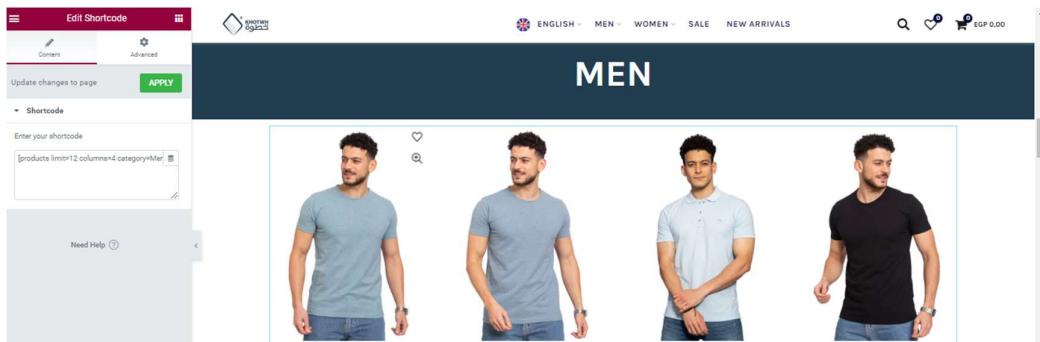

A screenshot of the Elementor editor showing a "Call to Action" module. The left sidebar contains various settings for the module, including "Content Style" (Basic), "Content Preset" (Preset 1), "Alignment" (Center), and "Content Type" (Content). The main area displays two cards. The left card features a woman in a tan parka with the word "WOMEN" overlaid in large white letters. The right card features a man in a patterned sweater with the word "MEN" overlaid in large white letters. Each card has a red "Shop now" button at the bottom. The top navigation bar shows "ENGLISH", "MEN", "WOMEN", "SALE", and "NEW ARRIVALS". A URL at the bottom left of the editor window reads "https://step.rf.gd/wp-admin/post.php?post=924&amp;action=elementor#".

Adding new arrivals section using woo product carousel :

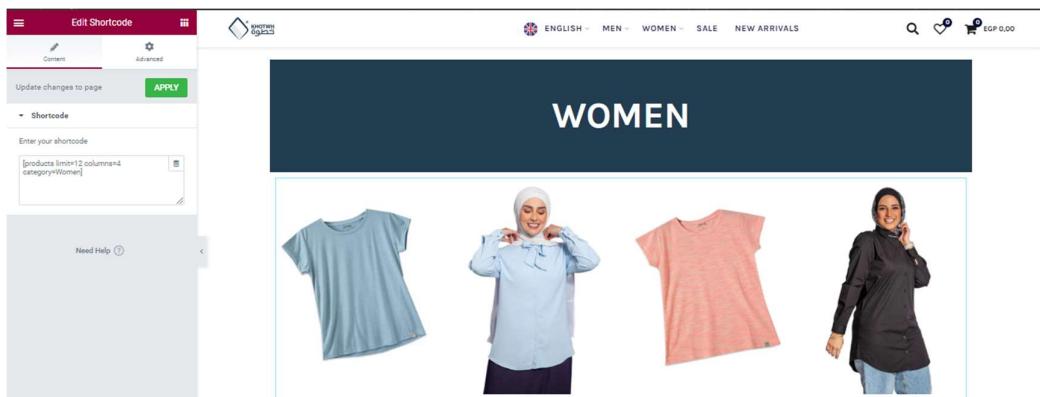

The screenshot shows the Elementor editor interface. On the left, the 'Edit Woo Product Carousel' panel is open with various settings like Layout, Show Title, and Image Size. On the right, a preview of a 'New Arrivals' section is displayed, featuring three products: Baby Blue B-Short Sleeve, Baby Blue Basic Polo, and Baby Blue Classic Tape Blouse, each with a small image, title, price, and rating.

Adding Men section using short code :

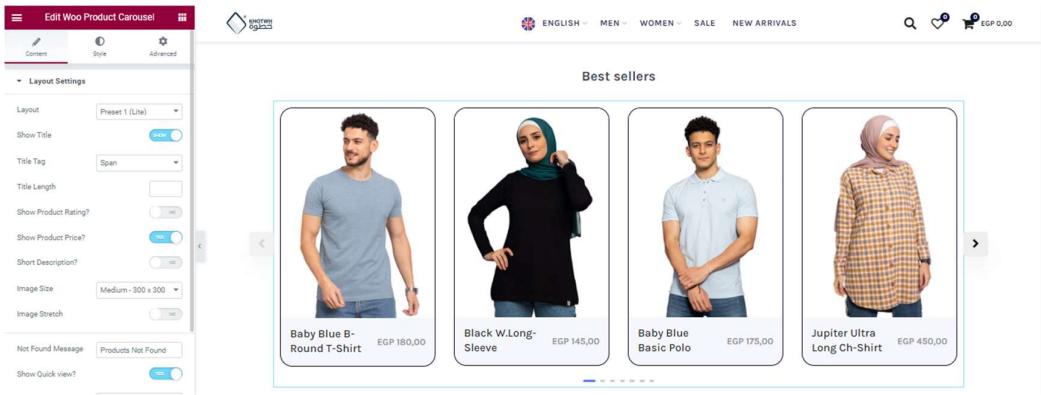

The screenshot shows the Elementor editor interface. On the left, the 'Edit Shortcode' panel is open with a shortcode input field containing '[products limit=12 columns=4 category=Men]'. On the right, a preview of a 'MEN' section is displayed, showing four male models wearing different shirts.

Adding Women section using short code :

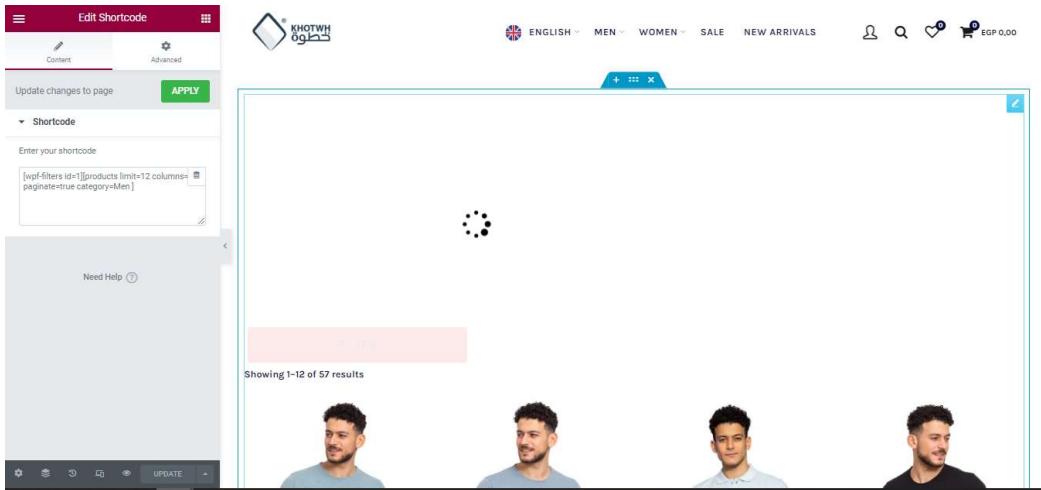

The screenshot shows the Elementor editor interface. On the left, the 'Edit Shortcode' panel is open with a shortcode input field containing '[products limit=12 columns=4 category=Women]'. On the right, a preview of a 'WOMEN' section is displayed, showing four female models wearing different tops.

Adding Best seller section using woo product carousel :

Second Men and Women pages using short code in addition to filter :

## 11. Essential Addons for Elementor

Enhance our Elementor page building experience with 90+ creative elements and extensions. Add powers to your page builder using our easy-to-use elements those were designed to make your next WordPress page and posts design easier and prettier than ever before.

Each element comes with a bunch of options to customize your website in every possible way. You can achieve nearly any design with your imagination.

No extra resources or messy codes to slow down your website. Optimized for super fast loading and instant Live editing.

Enable and disable individual elements to make your page loading faster and smoother. You can deactivate unnecessary widgets to keep the site lite.

This plugin provided us some features like call to action which we used it to build our categories sections in home page , and provided us with woo product carousel which helped us to build our images slider in both new arrivals and best seller section in our home page.

## Hosting:

### Netlify

Netlify is a remote-first cloud computing company that offers a development platform that includes build, deploy, and serverless backend services for web applications and dynamic websites.

In order to deploy our first demo on the website we had to install a plugin called Simply Static which is a static site generator that converts your existing WordPress website to a static website that you can host on your server, a static hosting provider.

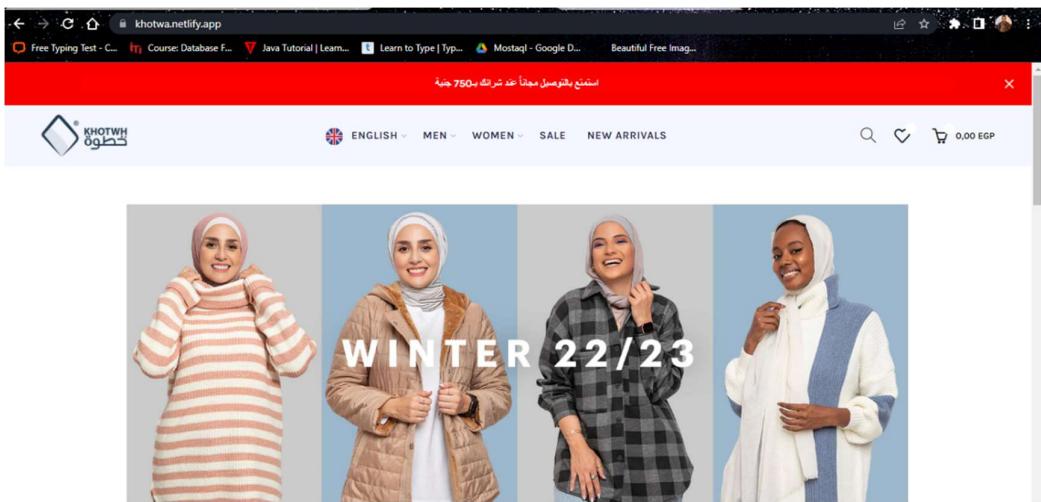

### **Problems with Netlify :**

It requires the final files of project and it is not suitable for live server or live editing .

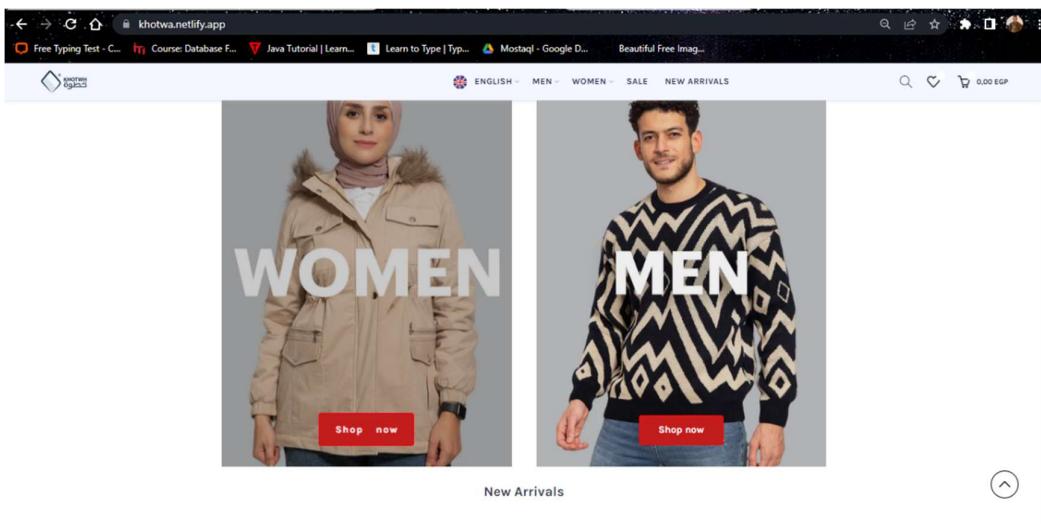

all content changes will be available for users after the build process is completed, unlike real-time alternatives.

Engagement of developers for the implementation of custom previews, UI widgets, and editor plugins.

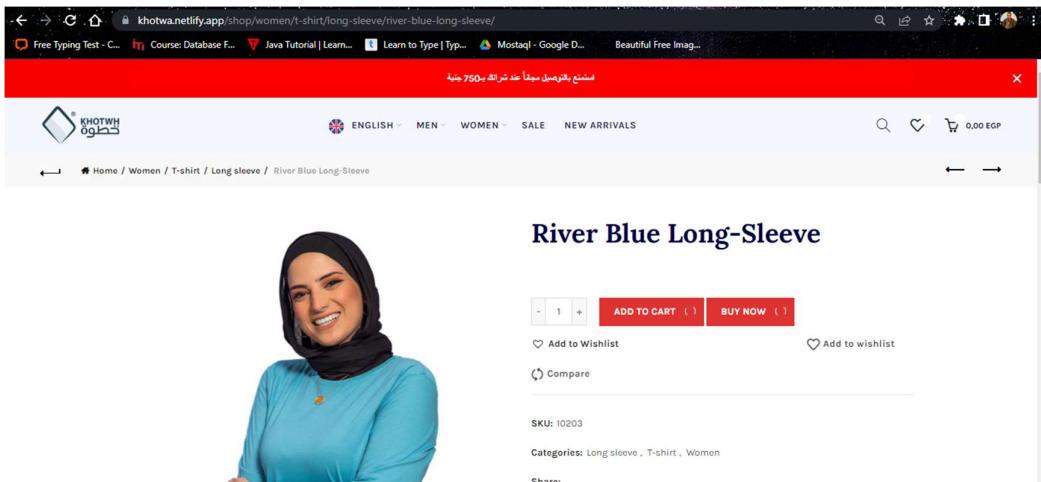

Customers cannot implement changes by themselves.

Some icons does not appear as it was on local host .

Short codes for adding products does not work at all .

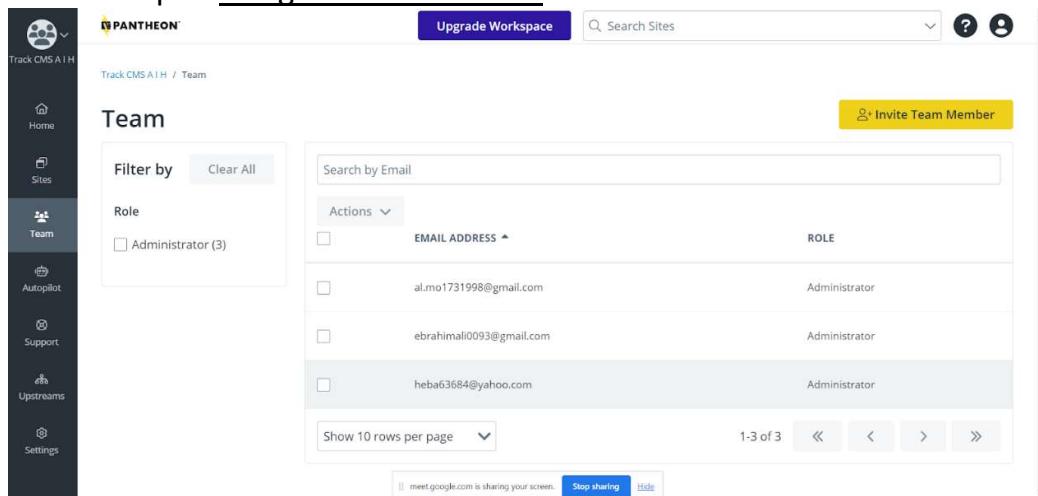

And when we try to buy a product the button keeps loading and does not add product into cart or lead us to checkout .  
So we kept searching for a proper hosting...

This is link for our demo version on Netlify  
<https://khotwa.netlify.app/>

## pantheon

**Pantheon** is a webops platform for open-source Drupal and WordPress websites. It is an app-specific Paas provider, sold on a monthly subscription basis, with several support tiers available.

Technologically, Pantheon applications run as software -as-a-service instead of running on users' own servers. Pantheon's service is built on top of Google Cloud Platform.

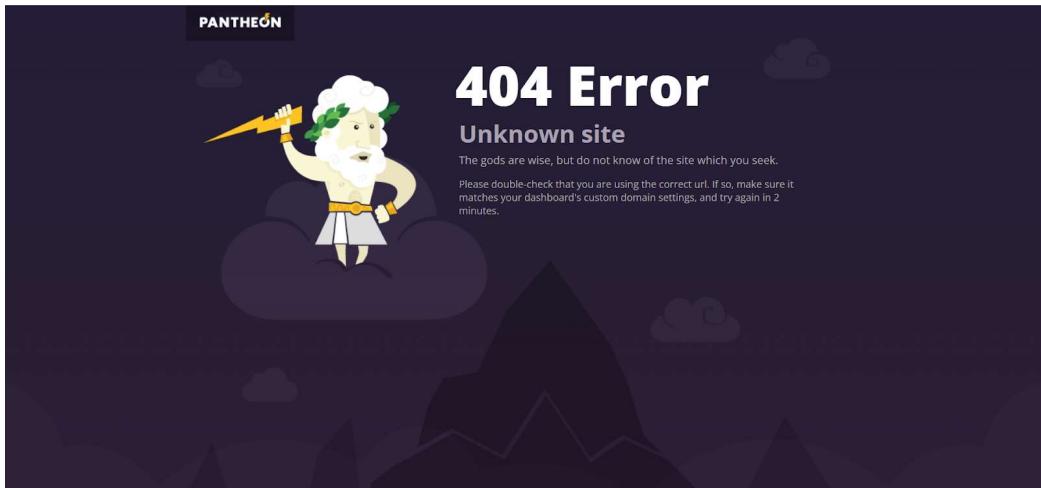

The screenshot shows the Pantheon web interface under the 'Team' section. On the left sidebar, there are links for Home, Sites, Team (which is currently selected), Autopilot, Support, Upstreams, and Settings. The main area displays a table of team members. The table has columns for Actions, Email Address, and Role. There are three entries, all marked as Administrators:

Actions	EMAIL ADDRESS	ROLE
<input type="checkbox"/>	al.mo1731998@gmail.com	Administrator
<input type="checkbox"/>	ebrahimall0093@gmail.com	Administrator
<input type="checkbox"/>	heba63684@yahoo.com	Administrator

At the bottom of the table, there are buttons for 'Show 10 rows per page' and navigation arrows. A message at the bottom indicates that 'meet.google.com is sharing your screen.'

But every time we upload a theme and some plugins the site crashes out with this error.

So we kept searching for a proper hosting website ...

## Infinity Free

Infinity Free is completely free, no credit card required and no hidden fees.

It never places advertisements on our website.

Infinity Free is website hosting with no time limit, and no limit on the number of websites we can host.

It provides us with a domain name or pick a free subdomain name from over 25 domain extensions.

Infinity Free is website hosting with no time limit, and no limit on the number of websites you can host.

After creating our account

- epiz\_33384359 Website for khotwh.great-site.net
- epiz\_33353105 khotwh.infinityfreapp.com

We used Control Panel

The screenshot shows the Infinity Free website control panel. At the top, there's a navigation bar with links for Home, Profile, Accounts, Free SSL Certificates, Site Builders, Domain Checker, Knowledge Base, and Community Forum. A user icon and the email address al.mo1731998@gmail.com are also present. The main area displays account information for 'epiz\_33384729' with a 'Manage' button. On the right, there are two prominent buttons: 'Control Panel' (green) and 'File Manager' (orange). Below these buttons, the 'Account Details' section is shown, listing fields such as Username (epiz\_33384729), Password (hidden), Status (Active), Label (Website for step.rf.gd), Website IP (185.27.124.116), Home Directory (/home/vol16\_2/epizy.com/epiz\_33384729), and Creation Date (2023-01-15).

## Seo plugins

The screenshot shows a green header bar with a checkmark icon and the text 'Ownership verified'. Below this, it says 'Verification method: HTML file'. A note below states: 'To stay verified, don't remove the verification file. To avoid losing verification, you may want to add multiple verification methods from the [Settings > Ownership verification](#)'. At the bottom right, there are 'DONE' and 'GO TO PROPERTY' buttons.

The screenshot shows the 'XML Sitemap' index page. It includes a brief introduction about XML Sitemaps and their purpose. Below this, it lists the number of sitemaps (5) and the generation date (January 28, 2023 at 11:48 pm). The main content is a table titled 'Sitemap Index' with columns for URL, URL Count, and Last Updated. The URLs listed are:

URL	URL Count	Last Updated

/product-sitemap.xml	Unknown	Jan 28, 2023		Couldn't fetch	0
/page-sitemap.xml	Unknown	Jan 28, 2023		Couldn't fetch	0

At the bottom of the table, there are links for "Rows per page: 10" and "1-5 of 5".

## 4.2 Hardware requirements

### 4.2.1 LAPTOPS

### 4.2.2 WIFI NETWORK

## 4.3 Steps of installation

- a) How to install the website on another new computer in detail  
1-Download WordPress.zip and step.rf.gd-20230128-225337-pkfxfa.wpress  
note: Make sure you have hosting server locally like xamp or others  
(b)Where to put files.  
2-uncompress wordpress files in another folder(folder\_name) in XAMPP\htdocs location  
3- open any browser write down localhost/folder\_name after creating database in PHPadmin  
4-follow steps choose site language add database name and user root make like this image detail

Welcome

Welcome to the famous five-minute WordPress installation process! Just fill in the information below and you'll be on your way to using the most extendable and powerful personal publishing platform in the world.

**Information needed**

Please provide the following information. Do not worry, you can always change these settings later.

Site Title	<input type="text" value="Khotwh"/>
Username	<input type="text" value="alaa"/>
Password	<input type="password" value="123456"/> <span style="color: red;">Very weak</span> <span style="float: right;"><input type="button" value="Hide"/></span>
<small>Important: You will need this password to log in. Please store it in a secure location.</small>	
Confirm Password	<input checked="" type="checkbox"/> Confirm use of weak password
Your Email	<input type="text" value="al.mo1731998@gmail.com"/>
<small>Double-check your email address before continuing.</small>	
Search engine visibility	<input checked="" type="checkbox"/> Discourage search engines from indexing this site <small>It is up to search engines to honor this request.</small>

### After installation

5-download plugin all in one wp and import its pro extensions from weadon website <https://weadon.com/all-in-one-wp-migration-unlimited-extension-gpl1/>

6- then import our site file step.rf.gd-20230128-22533

7-pkfxfa.wpress

c)How to run this file. after installation refresh site and enter username Alaa or Ibrahim or Heba with password 123456 Note Don't forget to deactivate plugins really simple ssl and all in one seo if installed if you want to open site again open any browser write down localhost/folder\_name/wp-admin

## 6.User/Customer testing

### 6.1 Users /Customers feed

When the customer used the website, he found that the website was easy to use and clear.

## 7. Future work

- 1.map about khotwa stores
- 2.add new products
- 3.multi lingual and
- 4.worldwide shipping
- 5.marketing the website
- 6.make product 3d to let customers try size and color
